Education

Bachelor of Arts, *Computer Science* '17

Grinnell College, Grinnell, IA, USA

Computer Science GPA: 3.84 - Cumulative GPA: 3.53

Experience

SOFTWARE ENGINEERING INTERN, KIFI. MAY 2015 - AUG 2015 - MOUNTAIN VIEW, CA

Kifi is a knowledge curation platform that helps individuals and organizations discover, retain and collaborate on information.

- Implemented an image carousel view that fetches images from the Flickr API asynchronously, allowing real-time image selection. Image picking rates grew by 16% on Android due to this feature.
- Developed caching infrastructure using MapDB and Bolts to be used throughout the app, reducing load times by up to 90%.
- Created a share intent extension that allows users to save content to libraries, or launch chats on webpages straight from the mobile browser.

SOFTWARE ENGINEERING INTERN, INGRAIN. JUNE 2014 - AUGUST 2014 - LAHORE, PAKISTAN

Ingrain is a video monetization framework that allows the placing of individually targeted ads into video.

- Developed an Android demo for Google I/O 2014 and an alpha version of the android SDK. 80% of code is still in production.
- Redesigned the Groopic Android app by Ingrain, which has 500,000 users, to accommodate Android L's material design philosophy.

LEAD ANDROID ENGINEER & PRODUCT MANAGER, APPDEV. FEB 2014 - PRESENT - GRINNELL, IA

Appdev is a mobile development group that develops applications to help the Grinnell College community.

- Maintain and oversee 6 Android applications with over 1,000 daily users. Received \$150,000 from the college after winning the Innovation Fund. Manage 5 developers and mentor new hires.
- Work on Android projects, such as G-licious (a personal dining hall assistant) and Grinwell (an app created for the Grinnell Wellness Challenge), and release them on to the Play Store.

Projects

TweetGoal

Twitter bot in Python that uses NLP (Alchemy API) to tweet specific soccer stats, based on user mentions.

Grant Application Management
